FOR IMMEDIATE RELEASE

R.E. Ginna Clean Energy Center Siren Test Scheduled for May 7

Sirens to sound for three to five minutes at 9:30 a.m.

ONTARIO, NY (April 30, 2024) – Constellation’s R.E. Ginna Clean Energy Center will perform a test of its public notification system between 9:30 a.m. and 10 a.m. on Tuesday, May 7. The test will involve sounding all 96 sirens in Ginna’s 10-mile radius for three to five minutes. Additional single-siren tests may be conducted throughout the day. Constellation tests Ginna’s siren system on a daily, quarterly and annual basis to ensure public safety.

Because this is only a test, no response by the public is necessary. In an actual emergency, the sirens would sound to alert the public to tune in to a local Emergency Alert System (EAS) radio or television station for information. Current EAS stations and other important emergency planning information for residents, workers, and visitors within 10 miles of a Constellation-owned nuclear power plant is posted on our website: [Constellation Emergency Plan | Emergency Plan Site](#).

R.E. Ginna Clean Energy Center is located on 426 acres along the south shores of Lake Ontario in Ontario, NY, about 20 miles northeast of Rochester and 53 miles southwest of Constellation's Nine Mile Point and James A. FitzPatrick Clean Energy Centers in Oswego.

R.E. Ginna Clean Energy Center generates enough carbon-free electricity for approximately 425,000 homes.

About Constellation

A Fortune 200 company headquartered in Baltimore, Constellation Energy Corporation (Nasdaq: CEG) is the nation’s largest producer of clean, carbon-free energy and a leading supplier of energy products and services to businesses, homes, community aggregations and public sector customers across the continental United States, including three fourths of Fortune 100 companies. With annual output that is nearly 90% carbon-free, our hydro, wind and solar facilities paired with the nation’s largest nuclear fleet have the generating capacity to power the equivalent of 15 million homes, providing about 10% of the nation’s clean energy. We are further accelerating the nation’s transition to a carbon-free future by helping our customers reach their sustainability goals, setting our own ambitious goal of achieving 100% carbon-free generation by 2040, and by investing in promising emerging technologies to eliminate carbon emissions across all sectors of the economy.
