Abbreviations: d.u. = dwelling unit.

Notes: See end of Schedule II for footnotes.

One acre = 43,560 square feet.

**Town of Ontario
Schedule II Footnotes**

^a When the general requirements of Schedule II are inconsistent with specific provisions set forth in the special conditions and special permits provisions of Article VII of this chapter, such specific provisions shall take precedence.

^b All subdivision roads shall have a fifty-foot front yard setback. Front yard setback for all residential lots on Lake Road shall be 75 feet. All town, state and county roads, excluding subdivision roads, shall have a minimum of a sixty-foot setback.

* If the front setback is 50 feet for a residential property, for which a building permit was issued prior to July 10, 1996, a fifty-foot setback may be used for an addition to a residential structure in any district. **[Added 11-24-1997 by L.L. No. 5-1997]**

^c For each foot of height in excess of 36 feet, increase the total width of side yards by five feet and increase front yard width by two feet.

^d When the applicant can provide engineering data to demonstrate that existing soil conditions on any lot are adequate to produce acceptable percolation tests, in accordance with percolation standards of the New York State Department of Health, the minimum lot may be reduced to 100 feet.

^e In areas that do not have public sewers, the minimum lot width required is 250 feet regardless of the number of dwelling units constructed. In areas with public sewers, the minimum required lot width is 200 feet.

^f Minimum lot area and lot width will also be subject to the New York State Department of Health requirements for sewage disposal systems and the off-street parking requirements of this chapter.

^g The front yard area may be used for off-street parking, but no such parking shall be located less than 15 feet from the street property line and/or right-of-way. A fifteen-foot green space is required running parallel and contiguous with the road. See § 150-38B(1)(i).

^h When a side yard abuts a residential district, such side yard shall be the same width as that of the abutting residential district and shall be landscaped.

ⁱ For each foot of height in excess of 40 feet, increase the total width of side yards by three feet.

^j Maximum coverage is 40% for any structure used wholly or in part for residential purposes.

^k 1. For purposes of this chapter, the lakeside of lots located on Lake Ontario shall be considered the rear yard and shall be 50 feet in depth or 20 times the average annual erosion rate, as determined by NYSDEC, whichever is greater.

2. Patios, decks, pools and unenclosed porches may extend into rear and side yards, but no such structure shall be located less than 10 feet from any property line.

^m From the area to be developed shall be subtracted non-buildable areas including streams, ponds and other watercourses; wetlands; floodplains; and steep slopes with a 15% or greater grade, to arrive at the total buildable area. The density of such total buildable area shall be at the rate of one dwelling per 1.25 acres. Each lot shall be a minimum of 35,000

square feet. The remaining area of the development shall be comprised of roads, other infrastructure and/or open space. **[Amended xx-xx-2007 by L.L. No. 1-2007]**
